DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 17-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of verb "can" (claim 17, line 10) to indicate possibility or probability that renders claims 17-30 vague and indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 17-21 and 31-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Hampel et al..

Hampel et al. discloses a semiconductor memory, a tracking circuit and a method of increasing bandwidth of a semiconductor memory having all the elements and steps as recited in claims as follows:

- a bank (RDRAM 18) of N arrays (banks 33, Fig. 1) each having a corresponding array address (bank address, column 6, line 35);
- a bus providing an array address signal, a row address signal and timing signals (column 17, lines 6-10);
- N tracking circuit (row address circuits, column 6, lines 23-24). Only the second array responds to a second sequence of timing signals constituting a second bank transaction before the first bank transaction is complete (column 7, lines 4-31); and
- the memory comprising a DRAM device (abstract).

Allowable Subject Matter

4. Claims 6-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 22-30 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach or suggest the detailed tracking circuit having a wordline block, a sense amplifier block and a column block as recited in claims 6 and 22.
